PROFILE

Advanced student of the University Technician Degree in Software Application Development (TUDAI) at the National University of the Center of Buenos Aires Province (UNICEN), with a focus on backend development using Java. Hands-on experience in designing and implementing REST APIs with Spring Boot, layered architecture, and software development best practices. Knowledge of Docker, relational databases, and API testing with Postman. Seeking professional experience to continue developing skills in real-world environments.

EDUCATION

University Technician Degree in Software Application Development (TUDAI)

National University of the Center of Buenos Aires Province (UNICEN) – Faculty of Exact Sciences

Status: Final stage of the program

Expected graduation: November 2026

Pending requirement: Supervised Professional Practice (PPS)

Relevant coursework: Programming I, Programming II, Information Technology, Web Development, English I and II

Additional certification: JavaScript Certificate (structured and object-oriented programming – advanced level)

TECHNICAL SKILLS

Backend: Java 17, Spring Boot (REST, MVC, Data JPA), REST API design (HTTP, JSON, status codes), layered architecture (Controller, Service, Repository), DTOs, validations, exception handling, and security.

Persistence: MySQL, JPA, Hibernate.

DevOps and tools: Docker, Docker Compose, Maven, Postman, Git, GitHub.

Frontend: React.js, Bootstrap, Tailwind CSS, HTML5, CSS3, JavaScript.

Languages: English intermediate/advanced (B2) – technical reading, writing, and conversation.

PROJECTS

Management Backend – Java and Spring Boot

Development of a REST API from scratch using Spring Boot and MySQL, with layered architecture, CRUD endpoints, JPA-based persistence, configuration through environment variables, and deployment with Docker on Render. Endpoint testing performed using Postman.

Web Applications – MERN and Static Websites

Development of web applications using React, Node.js, Express, and MongoDB, with public deployment (frontend on Vercel, backend on Render). Additional development of static informational websites using HTML and CSS for specific domains (photography and motorcycling), featuring responsive design and a usability-focused approach. Includes functional demos.

Academic Java Repository

Repository containing extensive practice in structured programming, object-oriented programming, data structures, recursion, and basic design patterns.

CAREER OBJECTIVE

To join a team as a Java Backend Developer in order to gain real professional experience in API development, software architecture, and best practices, applying my technical knowledge and strong motivation to learn.

AVAILABILITY

Immediate. Compatible with academic schedule. Remote or hybrid.

SOFT SKILLS

Responsibility, autonomy, logical thinking, fast learning, consistency, and technical communication.
